

**Lehigh Valley S Gaugers
March Meeting
at Bert Mahr's
in
Emmaus, Pa.
March 19th, 2006**

The LVSG had a great meeting at Bert Mahr's, Sunday, March 19th, 2006.

All that the members did was run Bert's trains on his dog boned two level "Conrail Eastern" layout and socialize.

This was a real treat as Bert's "Conrail Eastern" is the only S Scale layout on the NMRA 2006 National Convention in Philadelphia, Pa. and well worth a visit.

Bert runs his trains with Digitrax DCC / Sound and they all run prototypically, or not at all.

In our business meeting our main topic was the discussion of our Frank Titman "Spiral Hill" Hopper Car project and ways to let all S Gaugers know they are available. We have sold several hundred, and now need to move the rest of them.

The gang finished off the day with a splendid dinner at the Perkins Restaurant in Emmaus, Pa.
