

**Lehigh Valley S Gaugers Meeting
Saturday, December 10th, 2005
at
Dave Heine's
Easton, Pa.**

Part One 12-3-05 The meeting will consist of Benchwork, building backdrop supports with a different meeting format.

We start at 10:00 AM, break for lunch of assorted sandwiches, then work through the afternoon, then go out for a regular dinner.

Please bring along cordless drills/drivers and other tools you feel we will need.

Dave

Editorial note No minutes or images were taken at this meeting.

Part Two 12-11-2005

I want to thank those that came to my house on Saturday; Jamie, Barry, Bert, Frank, and Matt. We installed four benchwork sections from my old layout, modified another one and installed it, disassembled the remaining benchwork sections from my old layout and used the lumber to build four more sections.

I now have over 136 square feet of benchwork up, including one 4' wide peninsula over 18' long. This is in addition to what was installed before Saturday.

This was in spite of the fact that the basement wasn't cleaned up the best.

We had to move other stuff as we went.

Thanks,
Dave Heine

The three photos below were sent to us by Dave Heine, showing the progress as of 1-27-2006, made on re-building his Lehigh and Western Sn3 model railroad. Actually, Dave will have four railroads operating on his pike. (1) Lehigh and Western, a Sn3 Common Carrier. (2) Hemm-Locke Lumber Co-a Sn3 Logging railroad. (3) Jamestown & Jennville- a common carrier Sn3 railroad. (4) A standard S Gauge railroad, not yet named.
